About This Game

Minako is kind of like a tower defense game. The goal is to defend your castle for 30 nights. To do that you need to hire local villagers and assign them jobs. The key to victory is to keep in mind each villagers stats (str, dex, int) and skills and assign them accordingly. For example villagers with high strength will do better collecting wood or iron and will fare better on the front lines of battle. But it's not as straight forward as that. Keep a sharp eye and observe them well to develop your own strategy.

This game is great. It's cheap, like really cheap, I mean it's only a dollar! Plus, it has a bit of depth to the gameplay. You can have fun playing this game for hours on end. My only problem is that it doesn't explain anything to you. And by that I mean you literally have to learn everything for yourself. And since this is a lesser known game you can't just search up how to do stuff since basically nobody else plays this game. So it's a really good game for the price, but it's a little too complex to have no tutorial. But it's good, totally worth a dollar.. Very nice game for the price point. No tutorial, but that's the fun part I think. You have to discover everything for yourself. Keep in mind the stats and skills of each character and assign them to different jobs in order for everything to flow well. I love this game. You can sit and play it for hours and there'll still be more to discover. My friends make fun of me for playing it because of its nature as a grinding game, but it's still fun to play.. Minako~

It's all about Minako! :xmei:
